SPARTA Delivers Over 600 ScanEagle™ Airframe Components

SAN DIEGO, May 1, 2007 – SPARTA Composite Products, a business unit of SPARTA, Inc., has recently completed delivery of the 600th lightweight composite airframe component to Insitu, Inc. (Bingen, WA) in support of ScanEagle™, a leading-edge unmanned aircraft system (UAS).

Insitu, in partnership with Boeing, is the developer of ScanEagle™ and provides persistent intelligence, surveillance and reconnaissance data (ISR), battle damage assessment and communications relay. The platform was introduced as an economical, long-endurance UAS that

could provide persistent staring and flexible deployment options. Insitu's UASs have achieved more than 40,000 hours of operational experience in both commercial and military settings since 2004.

SPARTA Composite Products supports Insitu and Boeing by providing composite engineering, tooling, production engineering, full-scale airframe component production and hardware integration and sub-assembly services. The company has produced over 600 airframe components to date; on-time and with no in-service failures.

“We are very proud to be able to support the ScanEagle™ program, Insitu and The Boeing Company with this mission-critical sub-assembly. This is an extremely important system that provides our warfighters with an unprecedented level of real-time battlefield information”, stated Paul Oppenheim, Vice President and General Manager of SPARTA Composite Products.

SPARTA Composite Products is a business unit of SPARTA Inc., and is an industry leader in high-volume production of composite products and sub-assemblies for aerospace

and commercial systems. The company's product areas include aircraft engine components, UAV components, aircraft component, munition components and missile products. SPARTA is AS9100:2004/ISO9001:2000 Certified, and specializes in compression molding, RTM and hand layup/autoclave cure. SPARTA Inc. is a systems engineering and advanced technology company headquartered in Lake Forest, CA. The corporation is dedicated to serving our nation's needs within our core business areas of strategic defense and offense systems, tactical weapons systems, space systems, and information systems.
