

## NEWS RELEASE

### **SPARTA Composite Products Continues Achieving Excellence through Renewed AS9100 Certification**

SAN DIEGO, September 11, 2007 – SPARTA Composite Products, a business unit of SPARTA, Inc., has announced that Perry Johnson Registrars certified that SPARTA's quality processes continue to comply with the requirements of AS9100B:2004, and has been awarded a renewal to the company's AS9100 Certification. The certification covers design, manufacturing and distribution processes and confirms SPARTA Composite Products' commitment to continually improving processes and providing value to its customers.

"We understand how important it is to ensure our processes are in control. Being AS9100 certified has helped us to demonstrate to our customers that we are fully committed to meeting and even exceeding their requirements," stated Quality Assurance Manager Helen Addie.

Paul Oppenheim, Vice President and General Manager of SPARTA Composite Products, added that "Achieving AS9100 certification is difficult, but maintaining it is even harder. Our score on this latest certification was 99% out of 100%. Now we have a goal to reach a perfect score of 100% through our continuous improvement process."

SPARTA Composite Products is a business unit of SPARTA Inc. and is an industry leader in high-volume production of composite products and sub-assemblies for aerospace and commercial systems. The company's product areas include aircraft engine components, UAV components, aircraft components, munition components and missile products. SPARTA specializes in compression molding, RTM and hand layup/autoclave cure. SPARTA Inc. is a systems engineering and advanced technology company headquartered in Lake Forest, CA. The corporation is dedicated to serving our nation's needs within our core business areas of strategic defense and offense systems, tactical weapons systems, space systems, and information systems.
